OF REVENUE FOR 1908-9 AND 1909-10.

Revenue, General causes of Increase or Decrease, above £ 100.

- A. The decrease is attributable to a large decrease in the importation of flour partly counterbalanced by an increase in the quantity of wheat imported from Taganrog for local milling; shrinkage in local consumption of wine and production of cheap local wine (both pure and artificial) by which a corresponding quantity of foreign wine was displaced; and decreased consumption of beer, attributable to the prolonged absence of the Fleet and to increased temperance among the Troops and the Civil population.
- B. Due to a decrease in the number of steamers calling at this port.
- C. Due chiefly to a decrease in the number of sporting licences issued and smaller amount received for fines inflicted by the Judicial Police Courts.
- D. Fluctuation.
- E. Due mainly to increase in the number of acts filed in the Courts.
- F. The increase is due principally to fees levied on licences issued by the Superintendent of Police, the Superintendent of Public Health and the Collector of Customs under Government Notice No. 164 of 3rd September 1909, and proceeds of sale of meat undertaken by the Government during the strike of meat-vendors.
- G. Due chiefly to increase in the International transit rates owing to new method of calculation in accordance with the Rome convention.
- H. The decrease is attributable to reduction in traffic.
- I. Due principally to decrease in the quantity of water drawn by the Navy and private consumers, and elections of the Military Authorities to pay at a uniform rate of 1/- per 1,000 gallons under section 2 of clause 2 of the Water Works Regulations.
- J. The increase is due chiefly to further installations.
- K. Due mainly to non payment of rent for certain tenements within the year.
- L. The increase is due principally to smaller profit made by the Savings Bank and by the Monte di Pietà.
- M. The decrease is due chiefly to the transfer, in 1908-9, of a sum of £ 2,000 from Deposit Account to Miscellaneous Receipts.
- N. Due to sale, in 1908-9, of lands at "Ras Hanzir" to the Naval Authorities for £ 6,575

OF THE EXPENDITURE OF 1909-10.

Expenditure, General causes of Increase or Decrease, above £ 100.

- A. Decrease due to payment, in 1908-9, of interest on "Massa Frumentaria" which remained unpaid in previous years; less interest paid to the Savings Bank owing to sale of £ 7,000. Transvaal 3 per cent; and transfer of 35,000 Consols from Savings Bank investments to Schedule A in 1908-9.
- B. Increase due to excess of the amount of pensions granted during the year over the amount of the pensions that ceased to be paid.
- C. Increase due to larger expenditure on purchase of china and glass for the Valletta and S. Antonio Palaces.
- D. Increase due principally to the holding of a General Election and to the appointment of two Unofficial Members of the Executive Council.
- E. Decrease chiefly due to abolition of house allowance to the Assistant Secretary for Gozo, suppression of appointment of Deputy Assistant Secretary for Gozo and to reduction of staff by one clerk.
- F. Decrease due mainly to the re-organization of the Department.
- G. Increase due principally to larger expenditure in 1909-10, on oil and cotton waste, maintenance of permanent way and rolling stock and training of apprentices in the Technical School; and to special works carried out in Birchircara Station.
- H. Decrease due chiefly to the appointment of a Magistrate having remained vacant during a portion of the year.
- I. Increase due to vacancies in the ranks having been filled by redundant Marine Policemen in receipt of full salary and to larger expenditure incurred, in 1909-10, on transport owing to increased area of Police jurisdiction.
- J. Increase due chiefly to purchase of a disinfecting apparatus and higher expenditure incurred owing to an increase on the number of goats destroyed.
- K. Due principally to higher expenditure on clothing, bedding, rations and other necessities consequent on an increase in the average daily number of prisoners.
- L. Increase due mainly to periodical increments of salaries, appointments vacant during a portion of 1908-9, new appointments of Teachers in the Training School and of 3rd Class Mistresses, increased expenditure for remuneration to examiners owing to larger number of candidates for matriculation in 1909-10, allowance to Teachers for instruction in gymnastics, and larger expenditure for remuneration to Teachers for extra classes in the University and Lyceum.
- M. Increase due to installation of electric lighting in the General Post Office; change in the method of calculating transit rates in accordance with the Rome convention; payment in 1909-10 of certain accounts for share of postage on Parcel Mails outwards which remained unpaid in 1908-9; and to the fact that no postage stamps were purchased in 1908-9.
- N. Due to increase in the total amount refunded to the Imperial Government as drawback, and in the amount of duty refunded on manufactured wheat exported; purchase of a Revenue vessel for the Customs Department; payment of fees to the experts who reported on the drainage flushing scheme; and increase in the amount expended on the acquisition of land for public purposes.

OF THE EXPENDITURE OF 1909-10

Expenditure, General causes of Increase or Decrease, above £ 100

- O. Increase due chiefly to payment of salary of several gardeners formerly defrayed out of Head XXVI. Public Works; appointment of an Assistant Surveyor vacant during a portion of the previous year; payment of salary of four staffmen and seven labourers under the vote for chaining roads and streets, Head XXVI, during a portion of 1908-9; and increased expenditure on the maintenance of the Drainage System.
- P. Due principally to decrease in the number of house services laid and meters provided owing partly to the falling off in the number of new buildings and partly to a decrease in the number of licensed shops furnished with water service in 1909-10.
- Q. Decrease due to less expenditure on maintenance works in 1909-10.
- R. Due to a decrease in the number of new works carried out in 1909-10.

1909-1910.

COURSE OF EXCHANGE.

FOR THE YEAR 1909-10.

Exchange — Rates of exchange for cheques and bills on London in the course of the year remained nearly invariable

Since the abolition of the ad valorem duty on 3 d/s bills, by the English Stamp Act, there is no difference in the exchange between cheques and 3 d/s bills.

COINS.

Pursuant to an Order of Her Majesty in Council of the 24th September 1886, British Coins are the only legal tender in these Islands and the limit up to which Silver and Bronze Coins are received is raised to five pounds and one shilling respectively.

Twenty franc pieces and five franc pieces, both French and Italian, are now merely kept in deposit as articles of merchandize for exportation to the neighbouring centres of Trade such as Tunis, Tripoli, Bengasi, Syria, and Sicily, when a demand arises for them for the purchase of produce, or for the payment of bills payable in Francs or Lire. The deposit of such Coins greatly diminished, as in Tripoli and Bengasi Sovereigns are in demand when Napoleons are not obtainable at 15s. 11½d.

The currency consists of British gold and silver:—gold coin below legal tender weight is rejected. The system of making payments by cheques has been adopted by the whole Commercial community.

In February 1904 the Government made arrangements for the deposit of public moneys in the Anglo-Egyptian Bank, Ltd, Malta Branch, under certain conditions.

CIRCULATION.

The British gold coin held in Malta fluctuates according to the sums imported and exported and the requirements of the Fleet. It is at present roughly estimated at

Sovereigns	£450,000
Half-Sovereigns	15,000
				Total	£465,000
British silver and bronze coin at		25,000
				Specie	£490,000

The amount of note circulation, which is restricted to the notes of the Anglo-Maltese Bank and the Banco di Malta, cannot be ascertained, inasmuch as these Banks do not publish their accounts and they are not subject to any statutory control.

Corradino Prison **Questions.**Answers.*

I. If the Prison is on a separate system, is the separation complete? And if not, what is the separation enforced by day and night respectively?

This prison is on the mixed cellular system, as regards the criminal wards. The separation is complete as regards two of the five Sections under which the prisoners are classed, viz: A and B. In sections C and D association is allowed for three hours daily in the yards, but with *strict silence*, separation being enforced during the remaining hours. In Section E conversation is allowed with another prisoner designated by the Superintendent. By night the separation is complete for all prisoners.

II. If not on the separate system, what provision is there for the supervision of the prisoners while in association?

The prisoners, while in association, are supervised by Warders in the Male Divisions, and by Sisters of Charity in the Female Ward.

III. How many cells are there and how many wards?

There are 264 separate cells, and eight wards† A portion of the female ward has been cut off and is being used for the accommodation of prisoners awaiting trial, six additional cells have been constructed in the Juvenile Ward.

IV. Taking the average number of prisoners in gaol, how many cubic feet of space are there for each prisoner during the hours of sleep?

In the Criminal wards there are 1,120 cubic feet of space for each prisoner in 72 cells, and 1,260 cubic feet in the other 186 cells.

V. How are the prisoners classified?

In five Sections from A to E inclusive, six months good conduct being required before passing from one system to another of less severity.

* On the 18th March 1895, the Female Prisoners were removed from the Poor House to the Corradino Prison, where a Ward had been specially built from them.

† A Separate Ward containing four large cells was built for Lepers in 1903.

I. If the Prison is on a separate system, is the separation complete? And if not, what is the separation enforced by day and night respectively?

II. If not on the separate system, what provision is there for the supervision of the prisoners while in association?

III. How many cells are there and how many wards?

IV. Taking the average number of prisoners in gaol, how many cubic feet of space are there for each prisoner during the hours of sleep?

V. How are the prisoners classified?

Answers.

It is not on a separate system, and no effectual separation can, as a rule, be enforced either by night or by day in consequence of the premises being so defective and ill suited for the object for which they are intended, viz :

1. The temporary detention of prisoners, sentenced during the day, until their removal to the Corradino Prison in the afternoon.
2. The temporary detention of persons apprehended in the evening or by night until the next conveyance to the Corradino Prison.
3. The temporary detention of prisoners escorted from the Corradino Prison early in the morning to undergo trial before the Magistrates, or before H. M's Criminal Court.
4. The detention of prisoners sentenced to not more than three days.

They are occasionally supervised, day and night, by the Keeper of the Prison and by the Inspector and Sergeants of Police on duty at the Main Station.

There are 6 cells now in use, all the others are damp, dark and insanitary.

See Answer No. I.

A classification is not practicable.

I. If the Prison is on a separate system, is the separation complete? And if not, what is the separation enforced by day and night respectively?

It is not on a separate system, but the premises admit, generally, of the separation of persons sentenced to imprisonment from others who are under examination or remitted for trial.

II. If not on the separate system, what provision is there for the supervision of the prisoners while in association?

The are occasionally supervised by the Keeper of the Prison, or by the Warder.

III. How many cells are there and how many wards?

There are four cells and three wards, two of which wards with airing yards attached.

IV. Taking the average number of prisoners in gaol, how many cubic feet of space are there for each prisoner during the hours of sleep?

Both the cells and the yards being very spacious and considering the limited number of persons detained in the same, no possible doubt can be entertained of the prisoners being too closely confined.

V. How are the prisoners classified?

HOSPITAL RETURNS, for the year 1909-1910.

Central Hospital—*continued.*QUESTION II—*Continued.*

(I.) What quantity of Water is available for each Patient every day?

An unlimited quantity, as the building is directly connected with the aqueducts which supply the town. There is a constant supply both of potable and second quality water (hard).

What is the Source of Water Supply?

The potable water is conveyed from a natural spring to a storage reservoir about $4\frac{1}{2}$ miles from the town and thence by an iron main to the Hospital. The second quality water is pumped from a station about 3 miles from Valletta to a service tank whence it is distributed through iron pipes in the town.

What is the quality of the Water?

Good in every respect?

(II.) Detail the arrangements as to Baths and Lavatories.

The Baths (Rufford and Finch's 1st class porcelain Baths) are conveniently situated both for bathing patients on admission, and for ablution or cure during stay in Hospital. Two lavatories (Jennings Lift-up Lavatories) exist, one in each division, and two others (earthenware basins fixed in marble slabs) of which 1 in Lying-in Wards. The outlet pipes of Baths and Lavatories are completely disconnected from the drains by discharging into gully traps in the open air.

(III.) What is the system of Sewerage and what the condition of the Privies?

Water system. The privies are separated from the Wards and Corridors by means of ante-rooms thoroughly ventilated.

HOSPITAL RETURNS, for the year 1909-1910.

Central Hospital—continued.**QUESTION III.**

Number of Visits of Inspection paid to the Hospital during the year 1909-1910.

Specifying the character of the Visit in respect to Notice	And stating the Official Position of the Visitors		
	By the Governor or Colonial Secretary	By a Government Inspector (at Malta the Comptroller)	By a Committee of the Governing Body
Of Surprise 	Twice by H. E. the Governor Twice by H.H. the Lieut. Governor	The visits of the Comptroller are always sudden and take place very often about twice a week. The Chief Government Medical Officer visits the Hospital once a month.	Nil

(I.) In reference to the above Table, state whether or not the Register Books were produced on every occasion ; and if not, on how many occasions they were not so produced.

The Register Books are inspected by the Comptroller and his delegates, as he is responsible for the same.

(II.) And if on any occasion when they were examined, they were found not to be properly made up to date of examination.

The Books were found to be properly made up to date of examination.

(III.) State also how many reports of the following kinds have come under the notice of the Governor:—

- (a) Reports of a Financial and Statistical kind, especially such as show the system on which money and Store Accounts are kept and audited.
 - (b) Reports by Person charged with the immediate management of the Hospital.
 - (c) Reports by a Government Inspector independent of the Governing Authority of the Hospital.
- (Append copies of his Reports, if any).

These queries are not applicable to Malta as all the Charities in the Island are under the management of one Head Officer (the Comptroller of Charitable Institutions), who corresponds with the Lieutenant Governor, as often as occasion may require, on all questions connected with every detail of organization, discipline, and finance ; and gives an annual report on the working of the Department.

Seamen's Hospital—*continued.*QUESTION II—*Continued.*

(I.) What quantity of Water is available for each Patient every day?

An unlimited quantity, as the building is directly connected with the aqueducts which supply the town. There is a constant supply both of potable and second quality water (hard).

What is the Source of Water Supply?

The potable water is conveyed from a natural spring to a storage reservoir about $4\frac{1}{2}$ miles from the town and thence by an iron main to the Hospital. The second quality water is pumped from a station about 3 miles from Valletta to a service tank whence it is distributed through iron pipes in the town.

What is the quality of the Water?

Good in every respect.

(II.) Detail the arrangements as to Baths and Lavatories.

There is a Rufford and Finch's 1st class porcelain Bath, with hot and cold water laid on in room adjoining the Privy. There are three lavatories (earthenware basins fixed in marble slabs) in Medical Ward besides other movable basins in the Surgical Wards.

(III.) What is the system of Sewerage and what the condition of the Privies?

Water system. The water closets are situated in the yards. They are provided with efficient means for flushing, and are separated from the Wards by a thoroughly ventilated corridor.

HOSPITAL RETURNS, for the year 1909-1910.

QUESTION III.

Number of Visits of Inspection paid to the Hospital during the year 1909-1910.

Specifying the character of the Visit in respect to Notice	And stating the Official Position of the Visitors		
	By the Governor or Colonial Secretary	By a Government Inspector (at Malta the Comptroller)	By a Committee of the Governing Body
By Appointment			
Of Surprise	Once by H. E. the Governor Once by H.H. the Lieut. Governor	The visits of the Comptroller are always sudden and take place very often about twice a week. The Chief Government Medical Officer visits the Hospital once a month.	Nil

(I.) In reference to the above Table, state whether or not the Register Books were produced on every occasion ; and if not, on how many occasions they were not so produced.

The Register Books are inspected by the Comptroller and his delegates, as he is responsible for the same.

(II.) And if on any occasion when they were examined, they were found not to be properly made up to date of examination.

The Books were found to be properly made up to date of examination.

(III.) State also how many reports of the following kinds have come under the notice of the Governor :—

- (a) Reports of a Financial and Statistical kind, especially such as show the system on which money and Store Accounts are kept and audited.
 - (b) Reports by Person charged with the immediate management of the Hospital.
 - (c) Reports by a Government Inspector independent of the Governing Authority of the Hospital.
- (Append copies of his Reports, if any).

These queries are not applicable to Malta as all the Charities in the Island are under the management of one Head Officer (the Comptroller of Charitable Institutions), who corresponds with the Lieutenant Governor, as often as occasion may require, on all questions connected with every detail of organization, discipline, and finance ; and gives an annual report on the working of the Department.

QUESTION III.

Number of Visits of Inspection paid to the Hospital during the year 1909-1910.

Specifying the character of the Visit in respect to Notice	And stating the Official Position of the Visitors		
	By the Governor or Colonial Secretary	By a Government Inspector (at Malta the Comptroller)	By a Committee of the Governing Body
By Appointment	Once by H.H. the Lieut. Governor	The Comptroller of Charitable Institutions visits very often this Hospital always by surprise.	Several times by one of the Commissioners of Charity.
Of Surprise		The Chief Government Medical Officer visits the Hospital once a month.	

(I.) In reference to the above Table, state whether or not the Register Books were produced on every occasion; and if not, on how many occasions they were not so produced.

The Register Books are inspected by the Comptroller and his delegates, as he is responsible for the same.

(II.) And if on any occasion when they were examined, they were found not to be properly made up to date of examination.

Always up to date.

(III.) State also how many reports of the following kinds have come under the notice of the Governor:—

(a) Reports of a Financial and Statistical kind, especially such as show the system on which money and Store Accounts are kept and audited.

(b) Reports by Person charged with the immediate management of the Hospital.

(c) Reports by a Government Inspector independent of the Governing Authority of the Hospital.

(Append copies of his Reports, if any).

(a) These reports have never been called for by Government, but Registers are kept which show every detail for any kind of Statistic.

(b) The Medical Officer in charge of the Hospital sends in professional reports periodically, and corresponds, as often as may be required, on all matters connected with administration and discipline; but no annual report is prepared.

(c) No report of this kind has ever been prepared, as the Comptroller of Charitable Institutions is held responsible to Government for every detail of administration and discipline, is in constant communication with the Lieutenant Governor and gives an annual Report on the working of the Department.

(II.) Detail the arrangements as to Baths and Lavatories.

Four Baths, (two zinc and two marble composition) for special or for chronic cases, respectively, are conveniently situated both for bathing patients on admission, and for ablution or cure during stay in Hospital. Four lavatories exist, two in each division (earthenware basins fixed in marble slabs) for special and for chronic cases. The outlet pipes of Baths and Lavatories are completely disconnected from the drains by discharging into gully traps in the open air.

(III.) What is the system of Sewerage and what the condition of the Privies?

Water system. The privies are separated from the Wards and Corridors by means of ante-rooms thoroughly ventilated.

HOSPITAL RETURNS, for the year 1909-1910.

Connaught Hospital—continued.**QUESTION III.**

Number of Visits of Inspection paid to the Hospital during the year 1909-1910.

Specifying the character of the Visit in respect to Notice	And stating the Official Position of the Visitors		
	By the Governor or Colonial Secretary	By a Government Inspector (at Malta the Comptroller)	By a Committee of the Governing Body
By Appointment	Once by H. E. the Governor	The visits of the Comptroller are always sudden and take place very often.	Several times by one of the Commissioners of Charity.
Of Surprise	Once by H.H. the Lieut. Governor	The Chief Government Medical Officer visits the Hospital once a month.	

(I.) In reference to the above Table, state whether or not the Register Books were produced on every occasion; and if not, on how many occasions they were not so produced.

The Register Books are inspected by the Comptroller and his delegates, as he is responsible for the same.

(II.) And if on any occasion when they were examined, they were found not to be properly made up to date of examination.

The Books were found to be properly made up to date of examination.

(III.) State also how many reports of the following kinds have come under the notice of the Governor:—

- (a) Reports of a Financial and Statistical kind, especially such as show the system on which money and Store Accounts are kept and audited.
 - (b) Reports by Person charged with the immediate management of the Hospital.
 - (c) Reports by a Government Inspector independent of the Governing Authority of the Hospital.
- (Append copies of his Reports, if any).

These queries are not applicable to Malta as all the Charities in the Island are under the management of one Head Officer (the Comptroller of Charitable Institutions), who corresponds with the Lieutenant Governor, as often as occasion may require, on all questions connected with every detail of organization, discipline, and finance. Periodical reports are, therefore, considered unnecessary, as information on all points can be instantly obtained, when asked for.

Gozo Hospital for Contagious Diseases.—*continued.*QUESTION II—*Continued.*

(I.) What quantity of Water is available for each Patient every day?

Any quantity, as the building is connected with the aqueducts which supply the town of Victoria; and, besides, there is a large tank in the yard for house purposes.

What is the Source of the Water Supply?

Natural springs, as regards potable water. The tank, however, collects the water from the roof; this is used for purposes, other than drinking and cooking.

What is the quality of the Water?

Good in every respect. The water of the aqueduct is naturally filtered through rock and soil before being collected into stream and conveyed to a storage reservoir at Migiarro whence it is pumped through iron pipes.

(II.) Detail the arrangements as to Baths and Lavatories.

There are two Bath rooms each supplied with a cement bath with hot and cold water laid on.

(III.) What is the system of Sewerage and what the condition of the Privies?

Water system. The privies are separated from the ward and thoroughly ventilated. The sewage is conveyed in earthenware glazed pipes to a field at the north of the Hospital, at a distance of some 50 yards.

What is the Source of the Water Supply?

The potable water is conveyed from a natural spring by an iron main. There is besides, a reservoir which collects the water of the roofs and is capable of containing 2,171,787 gallons. The water is pumped therefrom to a service tank and used for purposes other than drinking and cooking.

What is the quality of the Water?

Good in every respect.

What is the amount available for each inmate every day?

Any quantity, as the building is connected with the aqueducts which supply the town. There is constant supply of potable water.

What is the number of (I.) Lavatories?

37.

(II.) Baths?

27.

(III.) Latrines?

40.

What is the system of Sewerage?

Water system. The privies are separated from the Wards and thoroughly ventilated. The sewage is conveyed in earthenware glazed pipes to the intercepting sewer, but a small portion of that of the Asylum for the Aged is used for irrigation in Government fields at some distance from the Asylum.

* Including the Infirmaries the Criminal Ward and those forming part of a detached building on the grounds of the Asylum, designated the Agricultural Colony, where quiet patients chiefly belonging to the agricultural class are kept.

What is the source of the Water supply; the quality of the water; and the amount of water available for each patient every day;

A natural spring, at a distance from the Asylum; the quality is good, and the quantity available for each patient every day is between 20 and 25 gallons for all services. Water for drinking is supplied under pressure from the aqueduct.

What is the No. of (I) Lavatories?
(II) Baths? †
(III) Latrines?

24. (Marble shelves with earthen basin).
24. (19 Carrara and five porcelain).
31. (23 in Wards, and 8 in the airing Courts), the former are built in projection and provided with cross ventilated anterooms and paved with marble. The troughs are provided with ventilating shafts and are flushed periodically and automatically. Those in the yards have Crown basins and are flushed periodically.

What is the system of Sewerage?

A main sewer along and outside the building receives branches from all the latrines, bath rooms, sculleries and wash houses, and discharges its contents on the grounds at a distance from the Asylum. The whole system is provided with ventilating shafts and has an automatic and periodical flushing, and the sewage is used for irrigation.

† A small building in Central Yard is supplied with all necessary hydropathic appliances for curative purposes.

LITERARY INSTITUTIONS.

No. of Inmates in 1909-1910	How supported	REMARKS
113	...	For Orphans of both sexes between the age of 6 and 16. With few exceptions, the children have lost both parents. The building was formerly the Hospital for Men.
3456	...	This Institution is for the reception of Male and Female patients, and contains 200 beds.
63	...	This Hospital, which was opened on the 20th March 1882, adjoins the Central Hospital and contains 26 beds intended only for seamen, who contribute 2/6 per day each for their maintenance and treatment.
81	...	Hospital for infectious diseases.
495	...	Enlarged in 1850. Capable of containing 72 patients—42 Males and 30 Females. This Hospital is partly used for convalescent patients from the Central Hospital.
343	...	This Hospital, which was equipped at the expense of His Royal Highness the Duke of Connaught, was formally opened by His Majesty the King, on the 22nd April 1909. It contains 67 beds, and is principally intended for cases of Phthisis.
855	...	Hospital for mental disorders. The building is situated at <i>Wied Incita</i> , between Notabile and Attard. It was opened on the 10th of July 1861, on which day the patients were transferred thereto from the Asylum at Floriana.
1138	...	For the reception of the aged and disabled poor, above the age of 60, and of persons affected with incurable diseases, of both sexes; women who have led a dissolute life and are anxious to repent; and foundling and deserted infants until nurses can be found for them in the country, or they become of age to be admitted into the Orphan Asylum.
69	...	For Male Lepers. The law is not yet applied to Female Lepers, for want of the necessary accommodation, which is, however, now being provided.
569	...	For both sexes, and capable of containing 60 patients.
189	...	Accommodates 160 aged and disabled poor (80 of each sex) above 60 years of age, with few exceptions, there being no Institutions for incurable cases in Gozo.
20	...	Hospital for contagious diseases.
